No morale issues.

HARMONIZED
Harmonization allows other species to connect directly with the Tinkers' machine god. Provided that a Machine Altar (🏛️) is present, harmonized populations are immune to the effects of morale, and will never revolt.

While the exact effects vary from species to species, harmonization typically renders a population significantly more capable laborers (+👤), but far less capable of creativity or independent thought (-🧠).

In the presence of a Machine Altar (🏛️), Tinkers may use harmonized colonists for Forced Labor or Experiments.
